
GSA Efforts to Fight Fraud, Waste, and Abuse

Key Savings Milestones & \$60 Billion+ Contract Savings Summary

Compiled July 20, 2026 | Based on GSA announcements, Agency Financial Report materials, OIG reports, and contemporaneous coverage

1. Executive Summary – The Largest Reported Figure

The largest single figure publicly reported by the U.S. General Services Administration (GSA) is **more than \$60 billion in federal contract savings** driven since January 20, 2025 (announced as first-year results around January 20, 2026). This aggregate encompasses procurement leverage, contract optimization and cancellations, real-estate right-sizing, regulatory streamlining, OneGov technology buying consolidation, and related efficiency measures intended to reduce waste and improve accountability for taxpayer dollars.

GSA Administrator Edward C. Forst: “Under President Trump’s leadership, we’re delivering on our promise to create a leaner, smarter, and more accountable government... The results speak for themselves.”

2. Important Note on Breaking Down the \$60 Billion

An official GSA breakdown of the \$60 billion figure into the categories **Uncovered**, **Stopped**, and **Prosecuted** does **not** appear in public sources. The \$60 billion is predominantly **cost avoidance and efficiency savings** from operational and procurement reforms rather than traditional fraud recoveries or prosecutorial judgments. Traditional fraud enforcement metrics (OIG recommended savings, monetary recoveries, and False Claims Act settlements involving GSA contracts) are reported separately and are substantially smaller (tens to low-hundreds of millions across recent periods).

The framing below is a reasoned mapping of publicly available numbers into the three requested categories for tracking and visualization purposes (e.g., a savings “pizza tracker”). Figures that are projections or multi-year estimates are clearly noted.

3. Reasoned Breakdown of Savings into Uncovered / Stopped / Prosecuted

A. Uncovered / Identified

Amounts identified as potential waste, underutilization, price variability, or improper-payment risk that have not yet been fully realized as cash savings or recoveries.

- **~\$3 billion+** – Potential capital repairs and operating-expense savings if the 45 additional high-cost / underutilized properties identified for accelerated disposition are successfully sold (nearly 15 million square feet).
- **Hundreds of millions** – GSA OIG financial recommendations for potential cost savings and recoveries in recent semiannual periods (e.g., >\$274 million in one six-month period; >\$360 million in another).
- Ongoing identification of price variability risks in the Multiple Award Schedule (MAS) program and other contracting channels that create overpayment exposure.
- Government-wide improper-payments context (~\$186–200 billion annually estimated across federal programs) that Login.gov identity-assurance upgrades and GSA’s participation in the White House Task Force to Eliminate Fraud are intended to help address.
- Specific investigative findings (e.g., bid-rigging schemes, HUBZone fraud valued at \$4.7 million, employee misconduct cases) that form the basis for later recovery or prosecution actions.

B. Stopped / Prevented / Avoided (Bulk of the \$60B+ Figure)

This category contains the large majority of the reported \$60 billion+ contract savings. These are realized or highly certain cost avoidances from cancelling underperforming work, negotiating better prices at scale, disposing of or rightsizing real estate, and streamlining regulations and processes.

- **>\$60 billion** – Aggregate federal contract savings driven by GSA since January 20, 2025 (headline figure).
- **\$1.1 billion** – OneGov first-year savings (April 2025–April 2026) from consolidating fragmented IT purchasing into ~20 unified agreements with major vendors (discounts up to 90%). On track for higher full-year totals per some reporting.
- **\$730 million** – Cost avoidance from lease renegotiations and strategic reductions in the leased portfolio.
- **\$415 million** – Avoided repairs and operating costs from disposition of 90 federal properties (portfolio reduced by >3 million square feet).
- **\$182 million** – Revenue generated from property sales.
- **>\$500 million** – Unnecessary or underperforming contracts canceled inside GSA.
- **~\$24 million annual** – Estimated ongoing savings from eliminating ~1,600 unnecessary MAS contracts in FY 2025.
- **\$7.1 billion** – FY 2025 acquisition-program savings delivered to customer agencies (category management, City Pairs, SmartPay, IT, Assisted Acquisition, etc.).
- Fleet: reduction of >1,000 vehicles; consolidation of 1,123 vehicles into GSA's centralized leased fleet.
- Regulatory streamlining (FAR rewrite cutting 484 pages / 230,000 words and 2,724 “shall/must” mandates; FMR reduced ~72%; Travel Regulation ~50%) projected to save ~\$900 million over the next decade.
- Charge-card account closures (hundreds of thousands of accounts) and spending-limit controls to reduce waste and fraud exposure.
- Login.gov enhancements blocking thousands of suspected fraudulent identity-verification attempts daily and raising identity-assurance levels for major partner agencies.
- Travel modernization (rideshare partnerships reporting 50%+ savings vs. prior ground transportation; >80% savings vs. certain shuttle contracts).

C. Prosecuted / Recovered

Monetary recoveries, settlements, judgments, and fines arising from investigations, audits, and False Claims Act (FCA) or criminal actions. These figures are material but orders of magnitude smaller than the operational efficiency savings above. GSA OIG works closely with the Department of Justice.

- GSA OIG recent periods: >\$40.3 million in monetary recoveries (one six-month period); nearly \$2.5 million recovered in another; earlier periods have shown larger investigative receivables.
- Notable FCA settlements involving GSA contracts or related work: Hill Associates / Hill ASC (~\$14.75 million IT services); NORESKO (~\$9.58 million energy savings performance contracts); Broadway Electric / Cornerstone (~\$21.3 million SDVOSB set-aside fraud); Sanford Federal (~\$3.1 million).
- Additional investigative outcomes include bid-rigging, HUBZone fraud schemes, employee pandemic-loan fraud, and other procurement-integrity cases that produce restitutions, forfeitures, and civil penalties.
- GSA joined the White House Task Force to Eliminate Fraud (May 28, 2026) to strengthen government-wide detection, investigation support, and oversight of contracting-related waste, fraud, and abuse.

Summary observation: For a visual tracker, the \$60 billion+ headline is best treated as primarily “Stopped / Prevented / Avoided” efficiency savings, with a much smaller “Prosecuted / Recovered” component from OIG and DOJ actions and an “Uncovered / Identified” pipeline of additional potential (especially real-estate dispositions).

4. Detailed Milestones by Major Category

Real Estate (Public Buildings Service)

- Disposed of 90 federal properties → portfolio reduced by >3 million square feet; avoided ~\$415 million in repairs and operating costs; generated \$182 million in sales proceeds.
- Lease portfolio actions avoided ~\$730 million in future costs.
- 45 additional high-cost / underutilized properties identified for accelerated sale (potential ~\$3 billion in repairs + operating-expense savings; ~15 million square feet).
- Illustrative individual actions: Des Moines historic U.S. Courthouse (first accelerated disposition; >\$891k annual O&M avoidance + >\$27 million capital repairs over 10 years); Menlo Park former USGS campus (~\$137 million sale); other sales/conveyances in Portland, Austin, Huntsville, Washington, D.C., and elsewhere.
- FY 2025 AFR context: ~\$729 million cost avoidance via lease actions; hundreds of millions more via property sales and deferred-maintenance avoidance (e.g., HUD HQ relocation, FBI-related moves).

Acquisition / Procurement

- Headline: >\$60 billion contract savings government-wide since January 20, 2025.
- Canceled >\$500 million in unnecessary or underperforming contracts inside GSA.
- FAR rewrite (with OMB, DoD, NASA): reduced by roughly one-quarter (484 pages, 230,000 words); removed 114 provisions/clauses and 2,724 “shall/must” statements.
- MAS rightsizing: ~1,600 unnecessary contracts eliminated in FY 2025 → estimated >\$24 million annual savings.
- FY 2025 acquisition-program savings delivered to customers: \$7.1 billion.
- SAVE Program (launched Sept 2025 with Treasury, building on GSA’s Defend the Spend): employee incentive (up to 5% of verified savings, \$10k cap) for documented contract cancellations/descopes after dual validation including mandatory GSA concurrence.
- Expanded Transactional Data Reporting to improve price visibility and reduce overpayment risk.

Technology / OneGov

- OneGov (launched ~April 2025): \$1.1 billion first-year savings by consolidating IT purchasing into ~20 unified agreements with major vendors (Microsoft, Adobe, Google, ServiceNow, AI providers, etc.). Discounts up to 90%. Accelerated AI adoption (some agencies <\$1 per agency for certain tools). Standardized security and support terms.
- Login.gov: blocks thousands of suspected fraudulent identity-verification attempts daily; upgraded major partners to higher Identity Assurance Level (IAL2) with biometric facial matching; added new forms of identity evidence. Positioned as a tool against the ~\$200 billion annual government-wide improper-payments problem.
- FedRAMP: eliminated legacy backlog; final review times reduced to under 30 days (~92% improvement); doubled cloud authorizations in one year; removed agency-sponsorship requirement under new 20x path.
- USAi platform developed to support federal AI testing and deployment.
- Integrated Award Environment modernization ahead of schedule (majority of functions on SAM.gov).

Fleet

- Reduced federal vehicle fleet by >1,000 vehicles.
- In 2025: consolidated 1,123 vehicles into GSA’s centralized leased fleet; entered three agency agreements targeting 100% conversion to GSA-leased vehicles (two completed); supported expansion needs of CBP and ICE while increasing process automation.
- GSA Fleet positioned as lower-cost relative to commercial leases and many agency-owned fleets.

Fraud Task Force & Cross-Cutting Oversight

- May 28, 2026: GSA joined the White House Task Force to Eliminate Fraud (chaired by the Vice President). GSA contributes procurement, technology, shared-services, real-estate, analytical, and investigative capabilities to detect irregularities, accelerate investigations, and root out waste/fraud/abuse in contracting programs.

-
- Continued partnership with GSA OIG on fraud-risk training and internal-control strengthening.
 - Charge-card and identity-verification controls noted above also serve as preventive anti-fraud measures.

Disclaimer: This summary compiles publicly available information as of July 20, 2026 for internal reference and visualization purposes (e.g., savings trackers). The \$60 billion figure is as reported by GSA; the Uncovered / Stopped / Prosecuted framing is an interpretive mapping and is not an official GSA taxonomy. Readers should consult the primary sources for the most authoritative and up-to-date figures. Some amounts are cost avoidance, revenue, or multi-year projections rather than cash recovered in the period.
